

## **DOVER DOUG'S 2012 PROGNOSTICATION**

Today is the tenth anniversary of  
Something quite extraordinary!

It's been ten years since Marc & Don discovered me,  
Burrowing behind the township building where no one could see;

To avoid an unsavory ending,  
I had to do fast verbal dancing;

I gestured & gyrated, hopped & skipped  
Hoping to show what I could do and not become a stiff;

It's been a long process to teach Marc & Don and then Maureen, groundhog  
speak;  
But they listened and learned and helped me deliver my prognostications, none  
of which could be beat.

Last year I was ready with my prediction  
of six more weeks of winter conditions'

Sadly the accumulation of snow and ice were of such concern,  
the event was cancelled so my friends and fans could stay safe and warm.

This year has been long and eventful  
From tsunamis, earthquakes and floods to an early snow fall.

So far on this Groundhog day  
I seem to have had a lot to say

But now it's time to end the banter  
And now, before I go - just one more thing  
...In 2012 we'll have an early spring
