SPRING 2014

DOVER TOWNSHIP WINS STATEWIDE COMMUNICATION CONTEST

Dover Township has received two awards for its entries in the Pennsylvania State Association of Township Supervisors' 46th Annual Township Citizen Communication Contest. The annual contest recognizes townships that have successfully communicated programs and activities to citizens.

Dover Township received both awards in the category of Cable TV Programming. The Township won both second and third place for two programs featuring our original character DOVER DOUG, who explores stormwater and recycling in the videos. These videos are available to view on the Dover Township website at www.dovertownship.org using the YouTube link. Upper Merion Township in Montgomery County took the top prize in this category.

Entries were submitted from across the Commonwealth of PA and were judged on the usefulness of the information presented and how well the information was communicated to Township residents. Publications were also judged on their overall attractiveness and readability.

Judges for the contest included members of the association's Publications-Public Relations Committee, representatives from the Governor's Center for Local Government Services, and staff members of the Pennsylvania Township News, the association's award-winning monthly magazine.

The Pennsylvania State Association of Township Supervisors represents Pennsylvania's 1454 townships of the second class and is committed to preserving and strengthening township government and securing greater visibility and involvement of townships in the state and federal political arenas. Townships of the second class represent more residents -5.5 million Pennsylvanians- than any other type of political subdivision in the Commonwealth.

Dover Township is proud to have been chosen for these awards. Our staff worked with many other agencies to make them educational and fun so that they would appeal to all age groups! Thank you to all the participants. Keep on the look-out for more educational videos starring our favorite groundhog, Dover Doug.

Greater Dover Historical Society

Blacksmith Shop

The Greater Dover Historical Society has been providing you with updates through the Dover Township Newsletter for years. We have had no major projects since the re-building of the Blacksmith Shop in Ketterman Park which is located in Dover Borough on Butter Rd.

The GDHS strives to have three speakers every year. In the spring 2014 we have planned the following (*You do not need to be a member to attend these events.*):

MARCH 20A General meeting with a SHOW & TELL
APRIL 17..... A Speaker-Virginia Kunkel-former Dover High School teacher
JUNE 17An Annual Walking Tour
JUNE 19..... A General meeting with a Strawberry Festival

In September, the Society holds a membership picnic held at Brookside Park in the Carousel building. This is a member only event to attend this picnic.

If you have a computer, I invite you to visit the GDHS website at: <http://www.gdhspa.org>. You may email any questions you may have to: doverhistory@gdhspa.org. The Society looks forward to any questions you may have and your attendance at our meetings which are held at Calvary Lutheran Church the third Thursday of every month except December.

FLOOD INSURANCE

Through FEMA, the Federal Government requires that any building or improvement located within a mapped flood area have flood insurance. FEMA has recently updated these maps, using newer technology and topographic information to better map floods. The result of this update is that the mapped flood areas have changed in many instances, either increasing or decreasing. This may affect your property and your need for flood insurance. These maps are available online at the link below. They are also available at the Township office for review. The new maps are not yet in effect, and property owners have an opportunity now to inspect the maps. Should property owners disagree with the mapped flood areas, they can file an appeal, which must be supported with engineering calculations. These appeals must be filed to FEMA before May 6, 2014.

Link to Flood Maps in .pdf: <https://hazards.fema.gov/femaportal/prelimdownload/searchResult.action> - Enter "Pennsylvania" and "York" in to the boxes, then scroll to the Index\Map in at the bottom of the first column to find the map that covers your area.

Mapped Flood Areas can also be reviewed in Google Earth by
downloading the overlay from this link: <https://www.rampp-team.com/pa.htm>

- Scroll down to "Lower Susquehanna Watershed" – about ¾ down the page – and look for the link below, with the globe icon.

2013 ANNUAL DRINKING WATER QUALITY REPORT

PWS ID#: 7670073 SYSTEM NAME: Dover Township

Este informe contiene información importante acerca de su agua potable. Haga que alguien lo traduzca para usted, ó hable con alguien que lo entienda. (This report contains important information about your drinking water. Have someone translate it for you, or speak with someone who understands it.)

WATER SYSTEM INFORMATION: This report shows our water quality and what it means. If you have any questions about this report or concerning your water utility, please contact Chuck Farley at 717-292-3634. We want you to be informed about your water supply. If you want to learn more, please attend any of our regularly scheduled Board of Supervisors meetings. They are normally scheduled the 2nd and 4th Monday of the month, unless the date happens to be a holiday. Call the Township Office (717-292-3634) to confirm the Board of Supervisors meeting dates.

SOURCE(S) OF WATER: Our water sources are 10 wells located inside the physical boundaries of Dover Township. The water from our wells is disinfected as the only form of treatment. However in 2013 the township started construction of a permitted Nitrate Removal system at well 10. Well 10 is expected to be placed in service with its Nitrate Removal system by the summer of 2014. We also purchase fully treated and disinfected water from the York Water Company.

A Source Water Protection Plan (SWP Plan) was completed in 2010 by SSM Group, Inc. The Plan was paid for by the PA Department of Environmental Protection (Pa. DEP). The SWP Plan found that our source(s) are potentially susceptible to RCRA facilities, golf courses, transportations corridors, commercial property, gas stations, underground fuel tanks, quarries, farming and manure application practices, and natural gas pipe lines. However due to water quality monitoring and the regulation of land use activities within our well head protection areas, the risk of contamination is low.

Our SWP Plan is available for public review at the Dover Township Municipal Building, 2480 West Canal Road, Dover, PA 17315. Call Chuck Farley, PWD at 717-292-3634 is you wish to schedule a review of the SWP Plan.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

MONITORING YOUR WATER: We routinely monitor for contaminants in your drinking water according to federal and state laws. The following tables show the results of our monitoring for the period of January 1 to December 31, 2013. The State allows us to monitor for some contaminants less than once per year because the concentrations of these contaminants do not change frequently. Some of our data is from prior years in accordance with the Safe Drinking Water Act. The date has been noted on the sampling results table.

DEFINITIONS:

Action Level (AL) - The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Maximum Contaminant Level (MCL) - The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG) - The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Residual Disinfectant Level (MRDL) - The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG) - The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Minimum Residual Disinfectant Level (MinRDL) - The minimum level of residual disinfectant required at the entry point to the distribution system.

Treatment Technique (TT) - A required process intended to reduce the level of a contaminant in drinking water.

pCi/L = picocuries per liter (a measure of radioactivity)

ppb = parts per billion, or micrograms per liter (g/L)

ppm = parts per million, or milligrams per liter (mg/L)

EDUCATIONAL INFORMATION: The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity. Contaminants that may be present in source water include:

- * Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- * Inorganic contaminants, such as salts and metals, which can be naturally-occurring or result from urban stormwater run-off, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.
- * Pesticides and herbicides, which may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses.
- * Organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, and septic systems.
- * Radioactive contaminants, which can be naturally-occurring or be the result of oil and gas production and mining activities.

In order to ensure that tap water is safe to drink, EPA and DEP prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. FDA and DEP regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline (800-426-4791).

INFORMATION ABOUT LEAD: If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Dover Township is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>.

NOTE: We overlooked collecting a sample for atrazine at entry point 106 (well 7) in 2013. However the well was not in use in 2013 thus leading to the missed monitoring.

Class – Monday & Wednesday 9:45 – 11:00 AM • Friday- 10:00 am to 11:15 AM

YOGA - At the Dover Township Building 2480 W. Canal Road

YOGA FOR RELAXATION - *Tuesday and Thursday Evenings 5:30-6:30 pm*

This class allows you to slow down and relax your mind and body. With our busy lifestyles, slowing down can be a difficult thing to obtain. Sometimes it inhibits our sleep and it can get in the way of our focus. Never giving ourselves time to rejuvenate can lead us to being irritable and short with the people we work with and our loved ones. If you have ever had a desire to try yoga but feel as though you are not flexible, thin or young enough, this is the class for you.

POWER YOGA – *Tuesday and Thursday Evenings 6:45-7:45*

This class has much more movement and is more likely to make you sweat. You will feel both relaxed and rejuvenated by the end of this class as well, it is just a different path to get there. If you have never done yoga before and you have healthy wrists and back, this is a fine class to start with. It is also a great class to continue with.

SATURDAY MORNING YOGA - *8:30-9:30 am.*

A fabulous way to shift gears from the work week to the weekend. Shed the worries of the week and re-claim your weekend time with this gentle Yoga class.

COST: *Yoga cards are only good for Yoga classes!*

- ~ 1 Class a week (8 classes) 3 months- \$30 resident/\$40 non-resident
- ~ 2 Classes a week (16 classes) 3 months- \$50 resident/\$60 non-resident
- ~ 3 Classes a week (24 classes) 3 months- \$70 resident/ \$80 non-resident

In speaking with some residents recently who are new to our Community, it became apparent that they knew very little about our Township Fire Department. I hope in the next few paragraphs to educate you all about The Dover Township Volunteer Fire Department.

Currently, we are located at 3700-1 Davidsburg Rd, Dover, PA and cover primary responsibility for 49 square miles in Dover Township and about 24,000 residents. Our average call volumes for the last 3 years have been right around 600 emergency calls per year and we respond with an average of 11 members per call. This number of responders is significantly higher than the National average of 5 for all volunteer staffed stations. In an emergency, you need to call 911 to have us dispatched. For non-emergency questions, please call 717-292-4196. Our dispatch center is York County 911, they send out an emergency tone to our pagers or phones to notify our members of a call. Long gone is the old house siren that used to alert us of fire calls.

Our membership comes from all walks of life and our roster is about 40 members. Currently, we have 12 members who live at the station and provide responses when they are not at work. On average, we respond within 1 minute of being alerted because we work very hard to keep staffing at all times in the Township. In our line of work, time is our enemy, so, being alerted, responding and acting as quickly as possible are all important to affect a positive outcome on whatever the emergency may be. Some of our members, who respond from home are our Fire Police officers, respond directly to the scene, many use courtesy lights or blue lights to alert those around them that they are responding to an emergency. We ask that you please yield the right of way to them so they may travel safely to assist at the emergency scene.

We are obviously asked to respond to any type of fire call from brush fires, to vehicle fires, structure fires and trash fires. We also respond to vehicle accidents with injuries, with entrapment and to unknown injury accidents. We handle hazardous material spills in conjunction with the York County Haz-Mat team. We handle many different type of responses for industrial accidents, public service and technical rescue and provide valuable services to our surrounding communities through Mutual Aid agreements. Our members maintain all our equipment our personal protective equipment and our apparatus. We train constantly and look for new and better ways to serve our community. Our mantra is "whatever it takes!" All that being said, we have to do risk analysis at every incident that we are called to. Our officers will risk nothing to save nothing and risk everything to save a life. Often these decisions have to be made very quickly with limited information, but it's how we keep our members safe.

Our members are dedicated individuals, some with just a few years of experience, others with a lifetime commitment of 50 years. Our administrative staff is just as important as our first line firefighters as they fight inflation, bills, recruitment and fundraising. Funding for us comes from several streams. One is through a fire tax that covers about 1/3 of our total budget, the rest comes from all other fund raising that we do, including, Bingo and our Fund Drive. Please support us in any fund raising event that we hold.

Members provide coverage 24/7/365 days a year. No matter what time of the day or night, no matter how tired we are, we respond because we care. Because someone, somewhere, is having the worst day of their life, and we want to try to make a difference, to take an out of control situation and bring it back under control. To keep others from getting injured, or to stop property damage. I am very proud of our men and women as they make a difference every day in the lives of the people we come in contact with. I hope next time you see one of those big red trucks, or someone with a Station 9 apparel on you, have a better understanding and appreciation of the commitment that our Volunteers make, and I hope it makes you smile to know that we are there for you.

Be Safe and please maintain your Smoke Detectors, practice fire drills with your family and support your local Fire Department. If you ever have the need for support through a public education event, please feel free to contact us. We love teaching and informing.

Regards: Glenn P. Jansen, *Fire Chief*

The Dover Township Fire Department has **BINGO every Friday night** at 3700 Davidsburg Rd. Door opens at 5 pm and games start at 6:45 pm.

Dover Township would like to thank the businesses that appear in this newsletter and to recognize them each as supporters and cornerstones of our community. For it is with their contributions that this newsletter has been produced at no charge to our residents.

Dover Area Ambulance Club

DAAC wants to remind people that we have a wheel chair van that can be used for handicap individuals who are wheel chair or bed bound to go to medical appointments. Call the office to set up an appointment at least 24 hours in advance. This is out of pocket expense, insurances will not cover the cost and we are reasonable.

DAAC is also in the process of changing our ambulances over to what is called a MICU (Medical Intensive Care Unit) which means the ambulance will be staffed with one EMT and one Paramedic which will be able to handle Basic and Advance Life Support calls. Recent changes to the Emergency Medical Services with the Paramedic intercept units have

mandated our need to change the way our services are provided to meet the demands of our residents needs.

DAAC is proud to be providing service to our residents for over 56 years.

SHILOH GARDEN CLUB

Our meetings are the fourth Thursday of the month at 10:45 am at the Dover Community Center at 3700 Davidsburg Rd.

UPCOMING TOPICS:

- March 27 - Terra Cotta History and Examples by Connie Holland
- April 24 - How to create a fairy garden by Judy Bono
- May 22 - Tour of Ladew Topiary Garden in Monkton, Maryland

DATES TO REMEMBER:

- April 22 is Earth Day and April 25 is Arbor Day
- June 26 - Program on Container Gardening by Kathy Quarles from SKH
- July 24 - Program Design with Perennials by John Geoghan
