Important Propane Safety Information

By: Glenn Jansen, Dover Township Fire Marshal

Over this past winter, I have had questions come into the Fire Marshal's office concerning use of propane and portable propane heaters in residences. Below are safety tips for you and your family in handling propane.

1. Handle any propane powered equipment cautiously and always follow the manufactures instructions.
2. Cylinders or tanks; greater than one pound, must be located outside of any structure. If you bring your gas grill indoors for the winter, be sure to remove the tank and leave the tank outside. If the tank or lines leak, this may leak propane into your home.
3. Never operate a propane grill or small heater that is designed for use outside within your home. Read all instructions and have propane gas equipment inspected periodically by a fuel/gas professional for possible leaks or malfunctions.
4. If you smell a strong odor of gas in any area, leave the area immediately and call 911.
5. Do not leave empty or full propane cylinders in your vehicle for an extended period of time. In warm weather. The gas in the cylinder can expand and the safety valve may then open and your vehicle may fill with propane.
6. Never smoke within 25 feet of any gas cylinder storage or dispensing area.

For other information concerning safe handling of propane visit any propane supplier web site.

EMERGENCY MANAGEMENT

PREPARING FOR THUNDERSTORMS

Anne Zarlenga

Emergency Management Coordinator

Be Prepared! Be Safe!

The above is a motto to live by. Each season has its hazards. I will be giving you tips for each hazard. The information comes straight from ReadyPa. More information is available on the information rack inside the doors of the township building.

Remember the 30/30 lightning safety rule: Go indoors if, after seeing lightning, you cannot count to 30 before hearing thunder. Stay indoors for 30 minutes after hearing the last clap of thunder.

Most lightning deaths and injuries occur when people are caught outdoors in the summer months during the afternoon and evening, so be particularly cautious of lightning this time of year.

Know the difference between a Thunderstorm

Watch and a Thunderstorm Warning: Watch - is a possibility of a thunderstorm in your area. Warning - is occurring or will likely occur soon. If you are advised to take shelter, do so immediately

Secure outdoor objects that could blow away or cause damage.

Shutter windows and secure outside doors. If shutters are not available, close window blinds, shades or curtains.

POWER OUTAGE: Call electric company FIRST. Then 911.

SMOKE TESTING OF SANITARY SEWER FACILITIES...

The Dover Township Public Works Department will be smoke testing the sanitary sewer lines within the township this year. The purpose of the testing is to identify broken fixtures or improper connections that allow unpolluted water to enter the sanitary sewer system. Smoke should not enter your premises unless a leak is present. If you encounter smoke in your structure call 911 (York County Control). The fire department is notified in advance of the smoke test area and will advise the public works department about any smoke investigation calls that it receives. A public works department employee will respond to assess the situation after the fire department personnel determine that the smoke is related to testing of the sanitary sewer system. The public works department employee will provide information to you about corrective action that you as a property owner or resident will need to take to repair or remove the broken fixtures or improper connections.

The smoke used during the sanitary sewer system testing is non-toxic, non-corrosive, and will not stain. If smoke enters a home, it will soon dissipate. Opening doors and or windows will help. Avoid unnecessary exposure to the smoke.

Again, call 911 when you encounter any smoke condition in your structure, and, if possible, wait outside for the arrival of the fire department.

Thank you for your cooperation in maintaining our sanitary sewer system.
