When you fertilize the lawn, remember . . . you are not just fertilizing the lawn.

It is hard to imagine that a green, flourishing lawn could pose a threat to the environment, but the fertilizers you apply to your lawn are potential pollutants! If applied improperly or in excess, fertilizer can be washed off your property and end up in lakes and streams. This causes algae to grow, which uses up oxygen that fish need to survive. So, if you fertilize please follow directions and use sparingly.

Clean water is important to all of us.

It is up to all of us to make it happen. In recent years, sources of water pollution like industrial wastes from factories have been greatly reduced. Now, more than 60 percent of water pollution comes from stormwater runoff, which picks up pollutants like leaking oil from cars, fertilizers from farms and gardens, and failing septic tanks. All these sources add up to a big pollution problem.

But each of us can do small things to help clean up our water and that adds up to a pollution solution!

Why do we need clean water?

Having clean water is of primary importance for our health and economy. Clean water provides recreation, commercial opportunities, fish habitat, drinking water, and adds beauty to our landscape. All of us benefit from clean water-and all of us have a role in getting and keeping our lakes, rivers, streams, marine, and ground waters clean.

What is the problem with fertilizers?

Fertilizer is a "growing" problem for lakes, rivers, and streams, especially if it is not used carefully. If you use too much fertilizer or apply it at the wrong time, it can easily wash off your lawn or garden into storm drains and then flow into lakes or streams. Just like in your garden, fertilizer in lakes and streams makes plants grow. In water bodies, extra fertilizer can mean extra algae and aquatic plant growth. Too much algae causes water quality problems and makes boating, fishing, and swimming unpleasant. As algae decay, it uses up oxygen in the water that fish and other wildlife need.

RENT-A-KID YORK COUNTY AREA AGENCY ON AGING

This program provides an opportunity for middle and high school students, in grades 7 through 12, to assist older adults in completing routine light-duty household chores, yard work, mowing lawns and shoveling snow. The goal of the Rent-A-Kid program is not only to get an important job done, but also to foster friendships between older adults and youth.

Adults, age 60 and older, in need of assistance with chores can call the Rent-A-Kid coordinator who will provide names and phone numbers for youth in their area. It is the responsibility of the older adult to contact the youth and discuss the job to be done, when it is to be done, the rate of pay for the job, and any other arrangements that need to be made.

Recommended pay rate is \$5 per hour. However, depending on the type of work and the ability of the older adult to pay, the youth may negotiate a more satisfactory rate of pay.

Youth interested in the Rent-A-Kid program should contact their school guidance counselor or call the Coordinator at YCAA for an application at 771-9103.

A Message from Dover Area Ambulance Club

Welcome to the warmer weather when we can finally enjoy the outdoors. Who would have dreamed that we would still be dealing with COVID-19 a year later. Our lives have surely changed.

Please remember that cloth masks need to be washed often, have one for each day of the week. Don't hang dirty masks from the rear view mirrors to blow in the wind and spread germs within the car. Use a brown paper bag to drop them in till you can wash them.

Discard disposable used masks into a trash receptacle, please do not drop them in parking lots to lay around for animals and birds to get stuck in the elastic.

Have trouble remembering your mask. Get a lanyard to hang it around your neck in the morning when going out, you will never be without it then.

Have a Safe and Happy Spring!
