SUMMER 2022

## *Message from the Township Manager*

The Dover Township Public Works Department would like to make the public aware that barricades cost the Township taxpayers \$113.35 per item. Unfortunately, these safety devices often end up missing from the site that they are placed, resulting in the need to pay for replacements. Therefore, to keep costs down, we are asking that residents be on the lookout for people taking these barricades or having them on their property. Please report these incidences to Dover Township or Northern Regional Police Department. We appreciate your assistance in this matter.

## Street Obstructions & Overhanging Tree Limbs

Street obstructions can cause safety issues, impacting the lane of travel for motorists and first responders. Some of the street obstructions have been defined as the following:

- Basketball nets/hockey goals within street right-of-way
- Dumpsters/storage containers illegally parked on the street
- Mulch/construction materials/grass clippings placed on public streets
- Unattached trailers parked in the street

Overgrown trees can block sight at intersections and overhang traffic signs, impairing one's ability to see oncoming traffic or possibly a stop sign. A detailed diagram for tree maintenance has been included below for reference.

Motorists, pedestrians, and cyclists need a safe, unobstructed way to navigate the streets of Dover Township while delivery trucks, tractor trailers, and RV's need an unobstructed lane of travel free of overhanging limbs. For a more comprehensive list of obstructions, please visit: [www.dovertownship.org](http://www.dovertownship.org) or call 717-292-3634.

## Project Lifesaver

Project Lifesaver provides law enforcement with a program designed to protect, and when necessary, quickly locate individuals with cognitive disorders who are prone to the life threatening behavior of wandering. The necessity of this program was determined through the correlation between cognitive conditions and the act of wandering. The program has grown from a localized program to a program recognized internationally as a proven and effective method of "bringing loved ones home."

The method relies on proven radio technology and specially trained search and rescue teams. Citizens enrolled in Project Lifesaver wear a small transmitter on the wrist or ankle that emits an individualized frequency signal. If an enrolled client goes missing, the caregiver notifies their local Project Lifesaver agency, and a trained emergency team responds to the wanderer's area. The first responders will then use the client's individualized frequency to locate the position of the individual.

The Northern York County Regional Police Department has nine officers trained in the operation of the Project Lifesaver Program. Four of these officers are School Resource Officers.

If you are a Parent, Guardian or Caregiver of an individual that is at risk of wandering away and you feel they should be enrolled in the Project Lifesaver Program please visit [www.nycrpd.org](http://www.nycrpd.org) and complete the information on the Project Lifesaver Page located on the right side of the home page.

If you don't believe that your loved one is a wandering risk but would like to provide the NYCRPD with information about their at risk or special circumstances, please visit [www.nycrpd.org](http://www.nycrpd.org) and complete the information on the At Risk Individual / Special Circumstances Page located on the right side of the home page.

# HANDLING MARKET *Volatility*

By: Kevin J. Smith, CFP®, CFA®, AIF®, ChFC®, CLU®, CAP®, CRPC®, CLTC®, NSSA®, RICP®, AWMA®, AAMS®

**Conventional wisdom says that what goes up must come down. But even if you view market volatility as a normal occurrence, it can be tough to handle when it's your money at stake. Though there's no foolproof way to handle the ups and downs of the stock market, the following common sense tips can help.**

#### **Don't put your eggs all in one basket**

Diversifying your investment portfolio is one of the key ways you can handle market volatility. Because asset classes often perform differently under different market conditions, spreading your assets across a variety of investments such as stocks, bonds, and cash alternatives (e.g., money market funds, CDs, and other short-term instruments), has the potential to help reduce your overall risk. Ideally, a decline in one type of asset will be balanced out by a gain in another, but diversification can't eliminate the possibility of market loss.

#### **Focus on the forest, not on the trees**

As the market goes up and down, it's easy to become too focused on day-to-day returns. Instead, keep your eyes on your long-term investing goals and your overall portfolio. Although only you can decide how much investment risk you can handle, if you still have years to invest, don't overestimate the effect of short-term price fluctuations on your portfolio.

#### **Don't stick your head in the sand**

While focusing too much on short-term gains or losses is unwise, so is ignoring your investments. You should check up on your portfolio at least once a year, more frequently if the market is particularly volatile or when there have been significant changes in your life. You may need to rebalance your portfolio to bring it back in line with your investment goals and risk tolerance. A financial professional can help you decide which investment options are right for you.
